1. INTRODUCTION

1. GREEN ERA was established in UAE with its head office located in Dubai, UAE.
2. GREEN ERA paid up capital is AED 300,000/-.
3. Our business activities include Building Contracting, Earthworks (Digging, Filling & Leveling), Landscaping, Civil Works & related MEP.
4. We have our branch offices and operations in Fujairah.
5. Over the past years, GREEN ERA has accumulated a strong & healthy market trust through simple principle that we follow. Earn trust with business.
6. At GREEN ERA, our employees have good experiences in their respective field that followed us to grow.
7. GREEN ERA is ISO 9001, ISO 14001 & OHSAS 18001 certified.

2. OBJECTIVE

Green Era's main objective is to meet the quality requirements for the service rendered in line with International standards and contract specification.

Green Era has a comprehensive quality control system to ensure the necessary quality checks are executed at all stages of the process including project execution & delivery of the final product. This enables us to respond to our customers' needs and offer them product as per their specifications.

Our strategy gives a clear path for growth, one which builds on the core strengths and traditions of the Group to ensure that it continues to capitalize on sustainable growth opportunities and maximize client service levels, whilst ensuring the highest standards in health, safety, environment, and staff welfare.

Green Era only employs professionals who have the adequate education, training, and experience to provide client with expertise necessary for questions and needs.

Our challenge is to always supply our clients with the products that are both superior and cost-effective.

3. STRATEGY OVERVIEW

The Group's objective is to enhance Green Era's position as a leading Building contractor, service provider, supplier & execution of material to construction, Landscaping, Earth Works, Road works, Pipeline project, Electrometrical works, Painting, stone & Tiles Cladding/ Flooring and to extend the Group's operations to support the needs of clients across a growing range of sectors and geographies.

Our strategy to achieve this goal:

Provision of solutions, via a vertical structure aligned to our clients' needs throughout the complete life cycle of their assets

The expansion of our core revenue streams into target growth markets, both within the Middle East and beyond

Applying our market leading strengths to support new and existing clients within the renewable markets

Expanding into new sectors where our core skills are complementary

Continuing to deliver high quality products on schedule and on budget for all our clients

Maintaining health and safety excellence across our operations and ensure our activities are environmentally sustainable.

4. MISSION, VISION & CORE VALUES

Our Mission:

'To achieve our objectives in an environment of fairness and courtesy to our clients, employees, vendors, investors and society. The commitment to provide the highest standards of quality and service has been the most tremendous aspects in keeping GREEN ERA a reliable name in the industry.

We are motivated to help our clients/customers succeed in completing their projects with total satisfaction. "Customer Satisfaction has been our prime focus from the start and we leave no stones unturned to achieve this."

Our Vision:

'Committed to excellence, quality, performance and reliability and provide our customers with quality products while continue to invest in the latest technology'.

At Green Era, we are constantly expanding our knowledge and technical expertise to serve our clients better and met the highest standards of excellence in terms of Quality.

Our Core Values:

We have always focused on having a strong and futuristic management outlook, which will help the company to venture into new business arenas as well as to maintain and improve on the existing areas. With the help of the efficient and dedicated employees of our organization, we have been able to reach new heights. Deliver on time, even to the most remote areas. Seek continuous improvement and produce quality products while respecting safety and environmental standards. Offer professional services and focus on customer retention.

5. QUALITY POLICY STATEMENT

Green Era's main objective is to meet the quality requirements for the service rendered in line with International standards and contract specification.

Green Era LLC has a comprehensive quality control system to ensure the necessary quality checks are executed at all stages of the process including delivery of the final product. This enables us to respond to our customers' needs and offer them product as per their specifications.

Green Era only employs professionals who have the adequate education, training, and experience to provide client with expertise necessary for questions and needs.

Our Commitment to Continual Improvement

We believe that the continual improvement of everything we do is essential to meeting our customers' needs and the long-term viability and credibility of the company. Our commitment to Business Improvement will:

- Deliver superior added value to our customers.
- Develop a financially stronger organization.
- Provide a challenging and satisfying work environment for our people.
- Create more effective partnerships with our suppliers.
- Earn the respect and recognition for business excellence from all who engage with us.

Quality Management System

To achieve the goals listed above, GREEN ERA will continue to maintain a Quality Management System which aims to comply with the requirements as relevant to our solution offerings and any other regulatory and safety standards required of us as an organization.

ISO Certificate

ISO 9001, ISO 14001 & OHSAS 18001 Certified

6. ACTIVITIES & BUSINESS

Specialized & Expertise in

- **Civil Construction & Earth works**
 - Civil Construction & related MEP works.
 - Earth Works -Excavation, Filling & Levelling
 - Road works
- **Landscaping Project**
 - Landscape design/Hard & Soft Landscape/Water fountain/Lawn Landscape/Vertical landscape
- **Slope stabilization, shotcreting & Fencing Works**
 - Slope Stabilization, shotcreting for Road projects
 - Rock revetment works for Reclamation Projects.
 - Chain link fencing, Gabions boxes for protection

We offer right selection of materials, machineries to complete the work with good price without sacrificing quality.

- Modernized managements, superior products and high reputation have combined to put on the track towards become a leading company in this industry.
- We keep on procurement studies of quality process and customer satisfaction.
- We believe in fair trade of business and take care of our customers.
- Customer satisfaction is the key to our success

7. PROJECT PLANNING, EXECUTION & CONTROL PROCEDURES

Planning

7.1	Introduction	
	This procedure details the controls to be effected during the process of carrying out the planning function.	
7.2	Purpose	
	The purpose of the planning function is to provide a full service of planning, related controls, and support services for the Project.	
7.3	Procedures	
	7.3.1	Project Activities
	7.3.1.1	Overall Strategic Programme
		The Overall Strategic Programme will be formulated to demonstrate Green era's strategy to complete the project. It will take into account such factors as: a) Availability of design information (with reasonable assumptions listed as appropriate). b) Items of long delivery and lead times. c) Logistical reasons evident or anticipated on site.
	7.3.1.2	Master Execution Programme
		a) As the design and investigations progress to a point where fundamental architectural, structural, and engineering intents are clear, the Master Execution Programme will be drawn up and presented in a bar chart format outlining period for detailed activities.
		b) In the absence of detailed design, assumptions will

			be made in accordance with international standards and the same will be submitted for approval.
		c)	The Master Execution Programme will constitute the keystone for all future planning exercises. A network logic diagram will be prepared to substantiate the flow of critical elements in the programme.
		d)	The Master Execution Programme will be reviewed on regular intervals to incorporate fundamental design variations as per requirements of Employer and other changes in the implementation schedule.
		e)	A Professional Management Contract team will be formed who will be issued a draft copy of the Master Execution Programme for comment. These comments will be incorporated after discussions with the Project Manager and a final programme will be issued for submission to the Main Contractor.
		The programme will only be altered by agreement with the Main Contractor/Employer if a major EI with time implications is issued or time extension granted. A master copy marked up with each month's progress shown will be held in the Planning office. To be used in the Monthly Reports to the Employer.	
		The programme will only be altered by agreement with the Main Contractor/Employer if a major EI with time implications is issued or time extension granted. A master copy marked up with each month's progress	

	shown will be held in the Planning office. To be used in the Monthly Reports to the Employer.
7.3.1.3	Execution Programme
	For the control of the Project, it will be necessary to produce in more detail, subsidiary programs for the works. These programs will be produced in sections or areas as information becomes available from the Professional Team and will be amended and adapted during the Project period as required to meet changing design and construction needs.
	The programs will be prepared using suitable network techniques in order to substantiate the logic and criticality of activities.
	The Construction Programme should be agreed with the Project Manager or his nominee and may directly relate to the master construction programme or may deviate from it to provide a target to be aimed at.
7.3.1.4	Short Term Programs
	Short term programs may be produced to develop detail not shown or any other programme and also to control certain site or off-site activities.
7.3.1.5	Details for carrying out and completion of Works Contractors' works. Appropriate detail for carrying out and completion of Works Contractors works will be produced for every

	Works Contract (with the execution of some preliminary packages).
7.3.1.6	Procurement Programme The Procurement Programme relates to the process of tendering and award of Works Contacts and is developed by the Planning Manager. It is an extract from the Master Construction Programme.
	The Programme when completed is issued to the Professional and Management Contract Team for comment and then issued to the Professional Team and/or Employer for comment or approval. Following agreement to the programme is amended as agreed and it is re-issued to all parties concerned.
7.3.1.7	Information Release Schedules The production of Information Release Schedules will be an ongoing process as the Project progresses. Prior to the appointment of each Works Contract the Planning Manager will issue an outline schedule of information required (as dictated by Project needs) to the Professional Team for their comment and/or approval. Following the appointment of the Works Contractor for each Work Package, the Works Contractor will agree his information requirements with the Professional and

	Management Contract Team and these may vary from the schedule indicated in the previous paragraph. The Information Release Schedule will be regularly monitored.
7.3.1.8	Progress of the Works
a)	Monitoring Progress The progress of the Project will be monitored regularly and not less frequently than monthly
b)	Progress Reporting The Planning Manager is required to coordinate the production of a report on progress to be issued to the Professional Team and/or Employer. This issue of this report will be timed to suite the Monthly Project Meeting.
c)	Works Contractors Works Contractors are to provide regular progress reports relating to their works for both on and offsite activities.
7.3.1.9	Commencing Site Operations Notices/notice to commence site operations will be issued to each Works Contractor. The notice should be discussed regularly with the Project Manager to agree the timing of their issue, relevant to the progress of the works. The Work Package Parcel Sheets will be used to monitor these notices.

7.3.1.10	Programme Numbering and Revision A numbering system for programs for the Project is to be devised in order that each program can be listed, catalogued and issue sheets produced to record recipients of each programme, the number of revisions published, and the date of issue.
7.3.1.11	Superseded Programs Superseded Programs will be clearly marked to show that they are not working programs.

- For preparation of tender enquiries for Works Packages, the Management Contractor will agree with the Professional Team and Quantity Surveyor which drawings are used for B of Q preparation and tender.
- A register of all Professional Team information received by the Management Contractor will be kept by the Project Manager. Periodically this will be cross referenced to the Professional Team's own register(s).
- A separate register of execution information will be kept by the Project Manager, this register will also show which Works Contractors have received the drawings their status and date of issue.
- Drawing issues to Works Contractors will be made on the document issue letter.

7.3.1.12	Works Contractors' Submittals
-----------------	--------------------------------------

a) Generally,

- For each of the Works Contractors a list will be compiled and agreed between the Executive Architect and the Management Contractor of the anticipated drawings/schedules/calculations samples required.
- Upon appointment of Works Contractors, the scope of their workshop drawing, and other submittals will be agreed, and a time schedule produced by the Works Contractor and agreed with the Management Contractor.
- Progress meetings will be held fortnightly, or more frequently as the need arises, where the drawing production programme will be monitored and any potential problems or opportunities highlighted.

b) Drawings/Schedules Calculations

- Four copies of all drawings/schedules/calculations will be submitted by the Works Contractor on the agreed format to the Management Contractor on site for review (completeness, build ability, etc.) and onward transmission to the Executive Architect for review against the design. These will be submitted with a completed Drawing Approval System (DAS).
- All drawings must be properly identified and dated; they must also state the package number. Each drawing or set of drawings submitted will be accompanied by a letter of transmittal stating any proposed qualifications, departures or deviations from Works Contract documents.
- Upon review by the Management Contractor and the Professional Team, the Works Contractors' materials, drawings, schedules, or

calculations will be assigned a status as follows:

X	Approved/No comment The Works Contractor may proceed to authorize fabrication, manufacture and/or construction provided that the work is in compliance with the specification.
Y	Approved with comments. The Works Contractor may proceed to authorize fabrication, manufacture and/or construction provided that the work is in compliance with the Professional Team's and/or Management Contractor's nations on the shop drawings and that the work is in compliance with the specification. Where comments alter the content of any of the submitted confirmations, the information shall be re-submitted immediately upon incorporation of the comments to allow the Professional Team to mark these with X status. Where they do not, drawings can remain unamended from the Y status.

Z	Rejected The Works Contractor shall not authorize work to be fabricated, manufactured and/or constructed and shall re-submit his drawings in accordance with the stated requirements.
	None of the above comments shall in any way modify or vitiate the Works Contractors responsibilities under the contract.

		The review time for the Works Contractors' submittals shall be as agreed:
		The Design Manager will put in place and maintain a tracking system for Works Contractor submittals. The status of information will be reviewed at meetings with both the Works Contractors and the Professional Team. The Works Contractor shall always keep a full set of his current drawings/schedules/calculations at site for reference. Any superseded information should be clearly marked and removed from the working set. Where work on site deviates from that shown on the approved working drawings, this should always be noted on the drawings to keep the information current.
	c) Query Sheet System ➤ Works Contractors will raise query sheets on their own individual formats. Each sheet will be uniquely numbered and dated. The number will include the package number. ➤ The Management Contractor shall forward these to the Executive Architect and send a copy to the appropriate designed to speed up the response time. All replies shall be returned to the Management Contractor by the Executive Architect.	
	d) Material Approved System (MAS) ➤ Material submittals from Works Contractors will be made in duplicate. They shall have a unique sequential number and contain the package number. Both copies shall be forwarded	

	to the appropriate designer and forwarded to the Executive Architect once comments have been made. All replies shall be from the Executive Architect. ➤ Samples shall be accompanied by a MAS sheet as described above; samples shall be delivered to site with the MAS reference clearly marked. ➤ Upon approval of the sample, it shall be placed in an agreed location on site and remain as a control reference. ➤ Mock-ups will be provided as required by the specification and shall be treated on a case-by-case basis.
7.3.1.13	Complaints A complaint insofar as the Quality System is concerned, shall exclude snagging lists and normal day to day contractual matters. The following shall be regarded as complaints:
	All complaints however received, shall be brought to the attention of Project Manager. The Project Manager shall keep records of any complaints and where he considered necessary shall inform the Superior Officials. Records shall be kept and required actions listed and monitored.
	"Complaints Register" which shall be maintained listing all complaints which have been received.
7.3.1.14	Material Testing Materials will be tested in accordance with the

		Contract specifications. Contractor will have included within his Quality and Test Plan a list of the tests which apply to his scope of works. Any specific requirements requested by the Contract Administrator will be respected such as the final approval of material which includes aesthetic judgment.	
	7.3.1.15	Meetings Introduction The following are the principal meetings which will serve to administer the project. Under each heading is listed their purpose, frequency, attendance, and administration, this in no way discourages the convening of additional meetings as necessary to resolve specific issues where these make effective use of all participant's time.	
	7.3.1.17	Technical Meeting	
		Purpose	To consider all technical matters related to the awarded Works Contracts. This involves reviewing.
	a)	The issue of construction drawings to Works Contractors, ensuring information flow is not delaying the works.	
	b)	The drawing issues relative to agreed Information Release Schedules.	
	c)	Potential variations/revisions to the works and their consequences on the design of proposed and existing Works Contracts.	
	d)	Any technical problems which have arisen on site.	
	e)	Any outstanding materials samples or site mock-ups.	

8. LIST OF EQUIPMENTS

SL.NO	DESCRIPTION	MODEL
1.	Komatsu Excavator	PC 400

12. ENVIRONMENTAL COMPLIANCE & SAFETY

Purpose:

To minimize impact upon the natural environment and prevent any spread or release of contaminated or hazardous substances during the contract period in the work area.

Responsibility

We shall take the responsibility in maintaining an effective environmental planning as per the Construction Environmental Control Plan (CECP) provided by the Project Management Coordinator (PMC). Even though all our project personnel involved in the execution have the authority to stop work when unsafe conditions to human health or the environment exist, we shall keep a person exclusively for environmental planning. He will coordinate with the Project Manager and other site personnel working in the execution area. He will be responsible for complying with, the applicable environmental commitment, procedures, restrictions and guidance specified in the CECP.

Environmental Management Controls:

Even though all our project personnel involved in the execution have the authority to stop work when unsafe conditions to human health or the environment exist, we shall keep a person exclusively for environmental planning. He will coordinate with the Project Manager and other site personnel working in the site.

A Daily Environmental Inspection Report (DIR) shall be submitted on a daily basis to the Project Manager as per the format provided in the document.

The Environmental Engineer shall check the submittals to be submitted on the Environmental Plan and take necessary actions if anything has to be done. He also shall conduct Environmental Awareness Training to the site personnel for better safety of the human and minimize potential adverse impacts to the environment.

Safety:

The safety of our workers and the goods of our clients are our number one priority and a part of our culture for decades. We are committed to the highest standards to safety consistent with sound transportation practices.

ISO Certificate: ISO 9001, ISO 14001 & OHSAS18001: Certified
